Max Energy  
**SPORT**  
POWER PROGRAMMER

***Hypertech's famous Max Energy power tuning is now available for the sport tuner market!***

The new Max Energy Sport Power Programmer is available for select applications of Honda, Infiniti, Mazda, Mitsubishi, Nissan and Subaru.

Tuning is optimized for both regular and premium fuels.

You can read and clear any diagnostic trouble codes.

You can also adjust the rev and top speed limits in the factory computer.

Depending on the vehicle, some programmers also feature adjustability for V-TEC controller engagement, 0-60 throttle restriction and cooling fan on/off temperatures.

The original factory tuning is stored in the programmer in case you need to revert back to stock tuning for any reason.

All Max Energy Sport Power Programmers are Internet update-able, allowing you to download any updates that may be available for your vehicle.

**Call your Karbelt Sales Rep or visit us at [www.karbelt.com](http://www.karbelt.com) to place your order!**
